VENDOR BACKGROUND

KōD is one of the reputed web development companies from the heart of Canada; Winnipeg, Manitoba. What started in 2010 as a single office company has now evolved into several offices across the prairies. KōD provides prestige web designs and web services. KōD has worked with notable clients such as Manitoba Lotteries, Booster Juice, and Trivago. Our objective is to create websites that stand out from others at an affordable cost. We at KōD believe that quality is what sets us apart.

CLIENT BACKGROUND

We understand that Poseidon wants to create a web presence and allow their users to have an easy and enjoyable experience while visiting their website. Poseidon is an upscale resort with locations in the Caribbean and Gulf of Mexico who pride themselves in providing their clients with unique experiences. We have studied your requirements and recognized that Poseidon is looking for a web solution to bring more clients to their resorts with an easy to use website. We are in the digital age and having this site will be crucial to the success of Poseidon and growing its company. Poseidon is dedicated to recognizing, rewarding and communicating with you. Your satisfaction is their top priority.

AUDIENCE ASSESSMENT

A) PRIMARY

The targeted audience for their website is middle to upper class families who want to get away from their busy lives. Poseidon is an all-inclusive resort that is upscale but still competitive in price with all its services. Poseidon offers a well-rounded number of amenities, services and experiences – fun for the whole family. Poseidon offers an exotic experience for couples making it a great choice for newlyweds who want to have a getaway from their busy lives. Being an all-inclusive resort, they take away all the stress and make it a place to come and enjoy quality time with family and loved ones.

B) SECONDARY

The secondary audience is corporates. Poseidon has conference rooms and training rooms available to hold up to 100 people in each room. They provide corporate packages that include suites, private conference room, catering, and supplies included with room. The primary corporates that come to Poseidon are big companies in construction, automotive, and insurance.

GOALS AND OBJECTIVES

The following are the goals and objectives of the project:

- Modern clean design
- Responsive design

- Easy to use booking
- SEO Friendly
- Professional Look
- Easy and Intuitive Navigation
- Ability to Register the Guest
- Social Media handles
- Dynamically Populated List for Destinations
- Contact Us form
- Login Page for guests
- SEO friendly
- Dynamically Updated Site Content like contact email and social media links
- Search and Filter Options to check for different rooms available
- Commenting section for users that are logged in
- New logo for Poseidon
- Dynamically updated available rooms
- Booking for users and guests
- Secure Payment Portal
- Easy Tracking of all Bookings and Available Rooms

WORKPLAN

Phase 1

Strategy, project meeting. Meeting with a client discuss details about a future project, get from the client RFP. Create an outline of the future project also include technology outline.

Phase 2

Project planning and resources. We will identify what do we need for the project. We can estimate the time and budget after we get all that we need for the project.

Phase 3

Design

Meeting with client discuss potential graphic design for the website, create an organized PSDs, review and update content, as a result, we will know how the website must be present.

Phase 4

Development (coding)

Start to upgrade web site by using HTML, CSS, upgrade home page and all navigation elements on the website. Also, in this phase we will code back end programming as well. We will implement validation in JS and PHP. We will also create and normalize MySQL data bases for our website and test this. As a result, we get secure access and more attractive web pages and easy rational navigation.

Phase 5

Content transfer

We start to put content on a website such as home page, linking, social media connection, contact.

Phase 6

Quality review Testing

In this phase, we will check how web site goanna work, we will test navigation, links, social media links. In this phase, we will be testing web site to check if it's any bugs there, if yes, we will fix this problem before the website start working.

Phase 7

Final testing

In this phase, we will finally check web site with the client before we put our site on launch. If everything will be working well and no errors, we can go to our last phase.

Phase 8

Launch/maintains

In this phase after all testing, we can publish website live on a host server, after this final phase we can not change anything.

PROJECT ASSUMPTIONS AND SCOPE

The pricing and planning for the project are based on these assumptions:

- Images and written content will be provided by Poseidon
- The website will only be in the English language
- The client is responsible for entering all content into the content management system
- Project Domain and hosting service will be provided by Poseidon
- Additional Features and Support will result in increased cost

TEAM MEMBERS

KōD takes pride over its people. Our in-house team consists of unique combination of experience, creativity and knowledge. But the thing that sets us apart is our attitude to always provide the ‘best-ever’ experience for our valued clients. We have a dynamic team of capable and experienced web designers, developer, content writers, UI/UX developers and managers who uphold the highest standards in the industry. We have an excellent market reputation in Winnipeg IT stream and a lot of positive feedback from our clients. Our team has always been appreciated for the quality work that’s – on-budget and on-time.

For this project, the assigned team members include 5 skilled professionals, passionate about their work: Krita Maharjan (PM, 15 years experience), will be organize and responsible for all kick off meetings, budget and due dates, Evgheni Sipco (Web Designer, 2 years experience), will be responsible for design and mock up for this web site. Katie Peters (Front end Developer, 5 years experience), will be responsible for coding by using coding languages such as HTML, CSS, JS. Narain Madabhusi (Back End Developer, 10 years experience), will be responsible for programming by using programming languages such as PHP. Juan (My SQL, data base, server), will be responsible for the data base of our web site and set up server.

RECOMMENDED SOLUTION

We are proposing a dynamic website, with an admin section, built using PHP and MySQL including validated HTML5 and CSS3 to meet your needs and provide the website with the unique functionalities it needs. We will be using the latest technologies available in web development that are used by millions of brands around the globe for their modern cutting-edge websites. POSEIDON chain of hotels need help to create a hotel reservation system for its customers.

- Through this new system customers can check the availability of the room based on their need and book a room in advance.
- We'll design your web templates using a *responsive design* which means the webpages will scale and adapt according to the viewed device of the users. The pages will switch to a mobile design under 768 pixels wide. It will operate smoothly across a wide variety of devices including mobiles, tablets and desktops with the big screen without breaking its flow.
- The proposed web application will have two modules: general and administrative. The general module will be accessible to the public and registered visitors, while the administrative panel will be accessible to only authenticated users of the system.
- Social media links will be provided for the customers to visit and increase your web presence.
- The website will also be tested thoroughly for both functionality and usability to ensure that it runs smoothly and to improve overall performance.
- Customers can avail discounts by signing up to their Poseidon loyalty program.
- Members need to login to be able to avail discounts.

SECURITY APPROACHES

KōD values the security aspect of your business and puts it among one of the top priorities during the development. At KōD, we understand the intensity and possible harm a poorly built website could cause. An e-commerce site is especially vulnerable to security threats as many sensitive information like transaction information, guest details etc. would be passed on a regular basis. This is why we use the best security approaches to protect you and your business against the security threats and limit your data to you. We use but not limit to the following approaches to ensure the most secure access to your website:

- SSL Certificate will be installed in the server to ensure secure exchange of sensitive information over the website and to payment portals
- Registration of member will be made more reliable by using email verification, where the user will require to verify the provided email address through a link sent to them with a unique registration code.
- All the passwords will be hashed using an encryption key before storing in the database using one-way hashing algorithm, to prevent against dictionary attacks.
- The content and inputs in the system will follow a FIEO principle (Filter Input and Escape Output). All form inputs will be filtered before processing into the system to protect against XSS (Cross Site Scripting) attacks. Automatically generated CSRF tokens will be used to avoid any CSRF (Cross Site Request Forgery) attacks. Most of this is done by Laravel, the framework we'll be using.
- All major changes to the database will be tracked with the person responsible and datetime for each of them.
- Only the admin will have access to the admin panel.

TIMESHEET

Completion Date	Item/ Action	Responsible
PLANNING AND EXPLORATION		
November 21, 2019	Kick off meeting	Team
November 21, 2019	Gathering Requirements	Krita
November 25, 2019	Server Set Up	Juan

PSD DESIGN STARTS		
November 25, 2019	Graphic Design starts and task assigned to everyone	Krita, Team
November 26, 2019	Graphic design ready for approval	Evgheni
CODING STARTS

November 27, 2019	Work on templates complete	Katie
November 28, 2019	Proposal ready with all elements attached	Team
December 4, 2019	Front end complete, with ability with ability to browse product catalog, pages, etc	Krita
PROGRAMMING STARTS		
December 9, 2019	Back end programming starts	Narain
December 10, 2019	Work on Back end Admin panel finished	Narain
December 11, 2019	Final product finished	Narain

December 13, 2019	Team presents to client.	Team
December 13, 2019	All final deliverables handed prior to meeting with client.	Team

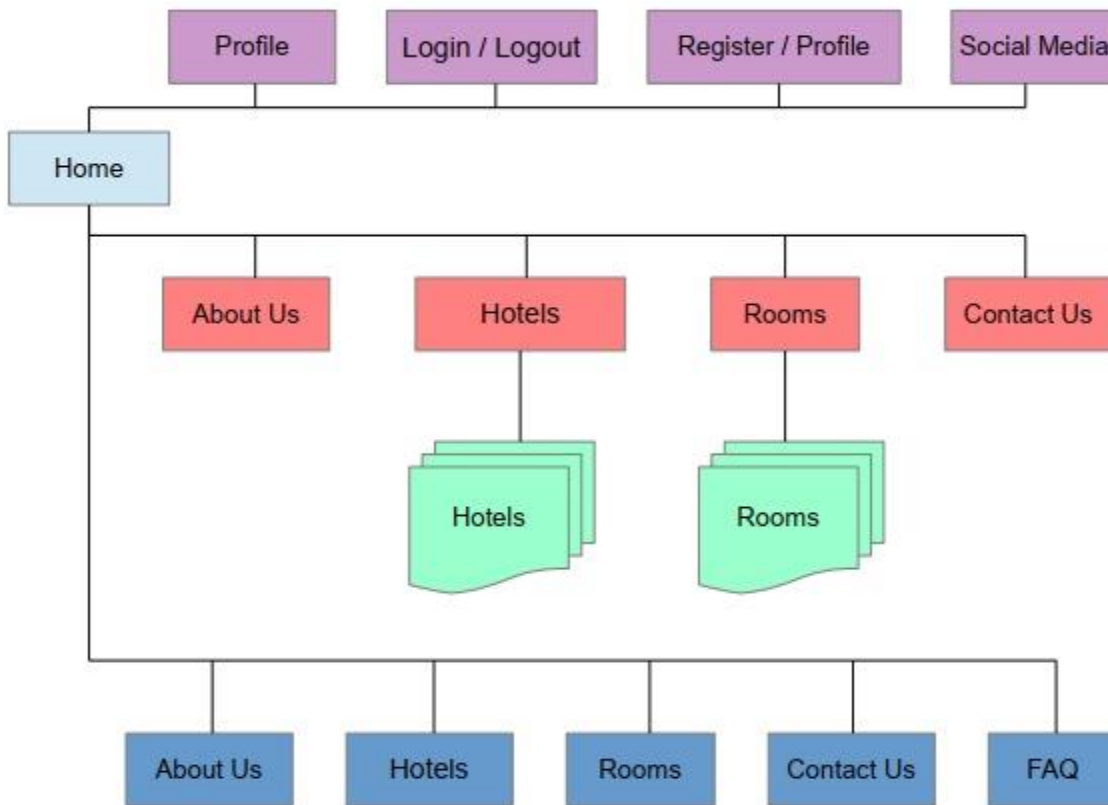

BUDGET

The table below shows a breakdown of total estimated hours worked on each phase and the cost estimated for each phase. KōD charges a reasonable amount of \$100 on average for every hour worked. Detailed invoice will be mailed to Poseidon on mutually agreed dates.

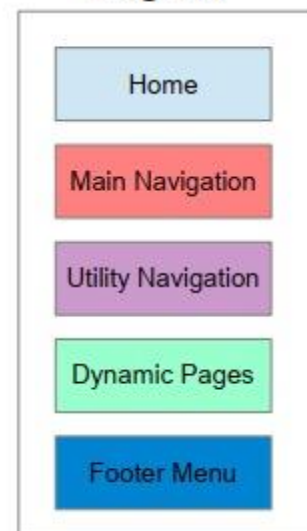

Task Description	Hours	Price
Planning / Exploration	45	\$4500
Design / Content	60	\$6000
Coding / Programming	85	\$8500
Launch (Hosting)	5	\$500
TOTAL (Without TAX)	195	\$19500
TAXES		
GST (5%)		\$975
PST (7%)		\$1365
TOTAL (Inclusive of TAX)		\$21,840

Note: The price mentioned above is not inclusive of maintenance services. In case of any change requests, additional costs would be invoiced to you depending upon the requested change. A deposit of 50% will be required before the project start date.

“Pursuing our values at all times and under a system of family management, our socially responsible contracting translates positively into one of our most important assets: our employees. In Poseidon, we strive for job stability, social services and the conciliation of work and personal life.”
- Janice G.

“The Poseidon Group is present in different places of the world, we are aware of and form part of diversity. We therefore understand and respect the plurality of views, culture and sensibilities among our workforce. We are a great family that fosters equal opportunities and which is inclusive and integrating.”
- Petar P.

“The principle that distinguishes Poseidon Group is based on the service its people offer. We therefore favour the personal and professional growth of our payroll, we invest in specific technical training in each area and constantly improve our Human Capital.”
- Steve G.

Who we are

Poseidon is owned by Lux Group Limited, a privately-owned business based in Melbourne. Lux Escapes is owned by Lux Group Limited, a privately-owned business based in Melbourne which was founded in 2009 by Jeremy Sane and Adam Schwab. Lux Group has more than 150 team members globally, with major offices in Sydney, Melbourne, Bangalore, Singapore and San Francisco. In addition to Lux Escapes, the Lux Group is a joint venture partner with the Catch Group in Scoop, Cudo and TreatMe.

“One of the most luxurious stays we have ever experienced.”
- New York Times

Poseidon Hotels & Resorts is a hotel chain with more than 100 four- and five-star hotels, located in the most popular holiday destinations in South America.

Hotel Overview - Roylton Hicacos Resort & Spa

Location Located in the Saligao area of Goa, the warm rooms of the Calangute is not too far from the sea beaches. People can visit the Mojo Play Zone located on the way to the beach. The Calangute Police Station is in close vicinity. Special Features The rooms of the Calangute are large, spacious and airy. The paints on the wall are bright and charge points are available beside the headboards. The lawn outside the hotel offers a wonderful seating area. One can even enjoy a game of billiards during their stay here. Amenities The visitors can enjoy AC, TV and the warmth of a queen-sized bed in the rooms of the Calangute. The swimming pool in the place is another wonderful addition to the bright aura. The place is protected by the strict surveillance of CCTV cameras. What's Nearby If people want something more than the in-house restaurant available here, people can dine at the Saligao Stories, Foxes Fiesta, K.G.N. Family Restaurant, Cafe Sussegado Souza or the Domino's Pizza.

CONCLUSION

Steve George thank you very much for the opportunity to work with you and contribute our efforts in this gorgeous project. We really appreciate your confidence it was a wonderful time and a great experience working for this project.

Sincerely,

KōD Consulting Solution
